

Mobile Data Centres

Portable, Custom Designed Data Centre Solutions

For any company that requires a secure, resilient Data Centre solution for a remote location, our prefabricated mobile Data Centres are custom designed, fully equipped with UPS and backup power, and can be delivered and installed at any location worldwide. Our mobile units are totally self-contained, highly portable and able to address your unique requirements.

Why Mobile Data Centres?

The cost and expertise associated with Data Centre development is significant and physical and time constraints can further hamper the implementation of a Data Centre environment.

Our prefabricated, Mobile Data Centres provide you with a practical solution that can be easily implemented at any location. Benefits associated with this portable design include:

- **Self-Contained and Mobile**
- **Relatively Low Cost**
- **Rapid Implementation**
- **Totally Customisable**
- **Easy to Connect to Utilities**

Customised Configuration

Our Mobile data centres are prefabricated and can be configured to meet your specific requirements.

The units are totally self-contained and equipped as standard with:

- Integrated UPS and Backup Generator Power
- Physical Security and Intruder Detection
- Cooling and Humidity Control
- Flexible Network Rack Configuration

Every component of the Mobile Data Centre is customisable, increasing application, adaptability and design possibility.

Mobile Data Centres can be permanently positioned at a production location, your predetermined recovery location, or utilised purely as a portable solution that can be relocated to any location as required.
